- Powered closing with exclusive and certified system.
- Manually operated only remote control with light and beeping signal complying with current regulations.
- Zinc plated iron structure and powder painting for a long life.
- Customizable colours, graphics and more.

Does not store the heat, the openings between each fan allow air circulation.

The Gazebox is designed to resist extremely strong winds.

It slows down the aging of the car's plastic parts and paint caused by wind, acid rain, extreme cold/hot temperatures, UV rays.

Effectively protects your car from scratches, bumps, parts theft, hail, falling objects, etc., preventing from losses of money and time.

The Gazebox is designed to resist heavy snow loads.

Significant reductions of time to warm the vehicle in winter and to cool it down in summer, saving fuel, protecting against dirt thus reducing the need of washing the car frequently.

It provides the desired privacy for the owner of a vehicle on special occasions.
